

Shoreline Restaurant & Bar, Paignton

Concrete Repairs & anti Carbonation Coatings

Project: Shoreline Restaurant & Bar, Paignton

Client: Torbay District Council

Concrete Repairs & Anti Carbonation Coatings

Main Contractor: TDA

Date: Jan 2021 & June 2021

The Problem

Shoreline Restaurant overhangs Paignton Eastern Esplanade. The columns, beams and soffit were showing signs of steel reinforcement corrosion caused by the aggressive sea side environment.

The Solution

Following acoustic hammer testing to identify defective areas, traditional concrete repairs were carried out. Using the Mapei Repair system. To protect against further corrosion sacrificial anodes were fitted to some of the larger repairs and all of the concrete elements were treated with an anti carbonation coating.
